## PROFESSIONAL SUMMARY

I am a newly graduated java developer offering enthusiasm and understanding of various programming languages. Looking to join an organization where the opportunity for growth and personal development is embraced.

Discovering Software Development was the best thing to ever happen to me. I began by teaching myself how to create websites using Content Management Systems. Soon after, I was offered an internship as a technologist by the CEO of a startup software company. This fueled my desire to attend a coding bootcamp. Currently I work as a freelance web-developer on a couple of on-going projects as I continue to expand my knowledge in new cutting-edge technologies.

## SKILLS

Javascript  
GraphQL  
HTML  
Git/Github  
Various IDE's  
Java  
React.js  
MYSQL  
CSS  
Various Frameworks  
Spring

## EDUCATION

Codeup Coding Bootcamp  
San Antonio, TX • Fall 2018

Java Development

The curriculum is specifically molded to give you access to real world development tools and best practices which allows you to gain confidence and intuition to continuing your learning.

Curriculum focuses on HTML, CSS, JavaScript, Java, MYSQL and Spring.
